Course Outline

This package includes these courses

- Inferential Statistics for Data Analysis Course (Self-Paced) (12 Hours)
- Designing an Analytical Study Course (Self-Paced) (12 Hours)
- Tools for Management Analysis Course (Self-Paced) (12 Hours)
- Data Analysis & Storytelling Course (Self-Paced) (12 Hours)
- Speaking with Confidence Course (Self-Paced) (18 Hours)

Attend the AI for Data Analytics Course for free as part of this certificate. Choose your date after you register for the program.

AI for Data Analytics Course (Self-Paced)

Inferential Statistics for Data Analysis Course (Self-Paced)

This intermediate self-paced course builds on descriptive statistics by covering inferential techniques for both categorical and quantitative data. Participants work through examples and exercises to understand hypothesis testing, estimation, and data-driven decision-making.

- Describe statistical sampling and draw a random sample with an acceptable minimal sample size.
- Determine statistical significance and test hypotheses for means and proportions.
- Calculate the chi square value for frequency data.
- Compare two sample means and two sample proportions.
- Construct a scatter diagram and compute a correlation coefficient.
- Calculate a regression equation and use it to predict a dependent variable.

Designing an Analytical Study Course (Self-Paced)

Learn to plan and design analytical studies using a proven, systematic framework that connects data, context, and recommendations. This self-paced workshop helps analysts develop well-structured research questions, design methodologies, and justify approaches for meaningful evaluation. Ideal for professionals developing studies in program evaluation or management analysis.

- Develop a plan to conduct an analytical study.
- Describe the major steps in an analytical study.
- Evaluate methods to collect and analyze data.
- Develop data collection instruments.
- Identify project milestones for an analytical study.

Tools for Management Analysis Course (Self-Paced)

Learn structured analytical methods for decision-making, problem-solving, process modeling, and performance measurement in the federal workplace.

- Apply analytical methods that support management decision-making.
- Analyze organizational problems.
- Create models that describe programs and work processes.
- Select and define measures of organizational performance.

Data Analysis & Storytelling Course (Self-Paced)

Master the art of data storytelling by analyzing data, crafting narratives, and designing impactful visuals. This hands-on course equips participants with techniques to communicate data findings effectively to decision-makers.

- Understanding the purpose of management analysis and the projects analysts conduct.
- Developing questions and applying descriptive statistics for data analysis.
- Creating and editing charts to enhance data visualization.
- Communicating data findings through structured storytelling.
- Designing presentations that combine data visualization and narrative techniques.

Speaking with Confidence Course (Self-Paced)

Learn to speak confidently in front of groups by mastering audience engagement, presentation organization, and delivery skills. This course provides personalized coaching and practical exercises to help you overcome public speaking challenges.

- Analyze and understand your audience.
- Organize presentations for maximum impact.
- Deliver messages skillfully and confidently.
- Handle audience questions effectively.
- Use visuals to enhance your message.
- Manage public speaking anxiety and build confidence.
