## Course Outline

This package includes these courses

- AI Governance & Oversight Course (4 hours)
- AI for Government Leadership and Management Course (4 hours)
- AI in Government Performance Management Course (4 hours)

Choose one of these options to supplement your core government leadership AI skills. Choose your date after you register for the program.

- AI Ethics for Government Employees Course
- AI Agents for Government Workflows Course
- Advanced Prompt Design & Reasoning Strategies for Government Professionals

## AI Governance & Oversight Course

Participants will engage in case studies, policy analysis, and hands-on exercises focused on establishing governance structures, managing cross-functional risks, overseeing third-party solutions, and responding to evolving legal and ethical requirements. The course emphasizes actionable strategies for embedding AI governance into agency policies, procurement, and daily operations.

- Define the pillars and principles of AI governance in the government context
- Evaluate and monitor AI systems for compliance, risk, and performance throughout their lifecycle
- Develop governance mechanisms for procurement, vendor oversight, and third-party solutions
- Address emerging legal, ethical, and policy challenges in AI deployment

## AI for Government Leadership and Management Course

Participants will analyze real-world case studies, engage in executive-level discussions, and develop action plans for aligning talent, technology, and mission outcomes. The course emphasizes actionable strategies to foster an adaptable, future-ready workforce and sustain public trust in the age of intelligent automation.

- Assess the impact of AI on the government workforce and organizational structure
- Develop strategies to lead workforce transformation and drive successful AI adoption
- Design talent management approaches for recruiting, upskilling, and retaining employees in AI-rich environments
- Establish ethical and governance frameworks to support responsible AI use across teams

## **AI in Government Performance Management Course**

Artificial Intelligence is revolutionizing how government agencies measure, analyze, and improve organizational and employee performance. This four-hour interactive training equips government employees with knowledge and practical tools to harness AI for more effective, data-driven performance management.

- Describe the role of AI in modern performance management systems
- Identify opportunities for leveraging AI to enhance goal setting, feedback, and evaluation processes
- Apply practical tools and frameworks for using AI-driven analytics to monitor and improve performance
- Assess risks, limitations, and best practices for responsible AI use in performance management
- Align AI-enabled performance management approaches with government guidelines and ethical standards
