## Course Outline

### Module 1: The Importance of Setting Priorities

- Identify sources of your priorities and describe how you set and manage them
- Assess the impact of unmanaged priorities on effectiveness and stress
- Understand the influence of behavioral change on prioritization
- Self-assess current skill levels and readiness for change

### Module 2: Looking at the Big Picture

- Clarify how your tasks support your organization's mission
- Recognize the significance of long-postponed "back burner" tasks
- Evaluate how incomplete tasks affect workload and performance
- Create actionable plans for completing overdue tasks

### Module 3: Prioritization Strategies

- Explore multiple prioritization perspectives, including the 80/20 rule
- Compare four different prioritization methods (e.g. Covey Matrix, Mayer ranking, etc.)
- Evaluate and address "urgency addiction"
- Match prioritization methods to personal and professional needs

### Module 4: Personality-Based Barriers

- Identify internal barriers to effective time and task management
- Explore traits like perfectionism, procrastination, "Only I", worry, indecisiveness, and fear of saying "no"
- Develop personal strategies to overcome limiting tendencies
- Practice decision-making and responsibility-sharing techniques

### Module 5: Time: Saving It, Making It, Managing It

- Identify common time-wasters and strategies to control them (e.g., email, meetings)
- Maximize small periods of time and reduce disruptions
- Use time logs to analyze and improve daily activity patterns

- Enhance productivity through realistic time tracking and prioritization

### **Module 6: Planning and Organizing**

- Use SMART goals to create actionable, realistic work plans
- Organize projects with effective time planning and delegation strategies
- Implement organizational systems like TRAF and date/verb-activated filing
- Overcome clutter and create efficient work environments
