Course Outline

This package includes these courses

- Premiere Pro Bootcamp (Self-Paced) (18 Hours)
- Premiere Pro Advanced (Self-Paced) (18 Hours)

Premiere Pro Bootcamp (Self-Paced)

Develop video editing proficiency with Adobe Premiere Pro by working through realistic, project-based exercises. This course teaches you how to organize and refine footage, clean and synchronize audio, adjust color for visual consistency, and export polished videos for a range of platforms. Perfect for beginners as well as those looking to strengthen their post-production skills.

- Edit and organize video and audio using efficient post-production techniques
- Clean up background noise and fine-tune audio levels
- Apply color correction and adjustment layers to improve visual consistency
- Enhance edits with B-roll, images, logos, titles, and transitions
- Adjust timing with speed changes, slow motion, and freeze-frame effects
- Edit multi-camera footage and perform green screen removal with chroma keying
- Resize and optimize videos for different platforms, including square formats
- Import After Effects projects into Premiere Pro and export final videos for clients or online distribution

Premiere Pro Advanced (Self-Paced)

Take your Adobe Premiere Pro skills further with this advanced course that emphasizes both creative control and technical precision. You'll dive into higher-level editing methods, including crafting custom transitions, adding visual effects, tightening fast-moving sequences, polishing audio, and creating professional vertical video suited for today's platforms.

- Cut high-energy action sequences with refined timing and rhythm
- Add visual effects to enhance style and impact

- Improve audio clarity and balance through advanced mixing techniques
- Edit and format vertical video for social and mobile-first viewing
- Manipulate speed and motion using time remapping tools
- Create picture-in-picture compositions for layered visuals
- Build custom transitions that create smooth, polished edits
