Course Outline

Module 1: AI Foundations and Business Applications

- Translate AI concepts into business-friendly language.
- Explore cross-industry use cases to spark transformation ideas.
- Workshop: brainstorm how AI could impact a current initiative.

Module 2: Building AI Vision & Strategy

- Align AI initiatives to organizational goals and metrics.
- Evaluate vendors, tooling, and organizational fit.
- Plan for data readiness, governance, and change management.
- Exercise: draft a concise AI vision statement.

Module 3: AI-Driven Efficiency and Effectiveness

- Target automation and augmentation opportunities in workflows.
- Use data-driven decision making and predictive modeling.
- Identify processes ripe for AI-assisted streamlining.

Module 4: Ethics, Compliance, and Responsible AI

- Surface risks: bias, fairness, privacy, and regulatory exposure.
- Debate trade-offs and mitigation strategies via scenarios.
- Draft lightweight guardrails and oversight practices.

Module 5: AI for Productivity and Innovation

- Apply AI features in everyday productivity tools.
- Explore AI's role in new product/service development.
- Action planning, resources, mentoring, and next steps.
