Course Outline

Module 1: The Legislative and Historical Basis of Working Capital Funds

- Examine the origin of Working Capital Funds (WCF) and their legislative foundation.
- Differentiate between appropriated funds and WCFs, including their operational characteristics.
- Explore the historical development of WCFs in defense and civilian agencies.
- Understand the role of WCF charters and regulations in guiding fund operations.

Module 2: The Operating Objectives of a Working Capital Fund

- Identify the primary objectives of WCF operations in efficiency, cost recovery, and customer service.
- Understand customer-provider relationships and incentives in a WCF environment.
- Analyze the role of cost allocation and pricing in achieving full cost recovery.
- Learn methods to promote cross-servicing and effective resource use in federal agencies.

Module 3: The Financial Concepts Used in a Working Capital Fund

- Understand key WCF financial terms and objectives.
- Analyze the relationship between financial statements such as the Balance Sheet and Net Cost Statement.
- Explore concepts like Net Operating Results, Accumulated Operating Results, and break-even principles.
- Review the reporting and accounting requirements for WCF operations.

Module 4: Cost Elements of a Working Capital Fund

- Distinguish between direct, indirect, fixed, variable, and semi-variable costs in WCF operations.
- Understand cost allocation methods and their effect on pricing and performance.
- Learn unit cost concepts and methodologies for cost control.
- Explore the impact of depreciation, maintenance, and cancellations on WCF costs.

Module 5: Budget Formulation in a Working Capital Fund

- Understand the steps in developing a performance-based budget for WCF operations.
- Analyze the role of customer orders in shaping WCF budgets.
- Review congressional and OMB requirements for budget submissions.

- Identify the importance of accurate rate projections in customer budgeting.

Module 6: Rate Development in a Working Capital Fund

- Learn types of rates and pricing strategies in WCFs, including actual and allocated costs.
- Understand stabilized rates and their importance for budget planning.
- Develop methods for calculating surcharges and add-on percentages.
- Explore cost allocation fairness and customer engagement in rate-setting.

Module 7: Budget Execution

- Review the budget execution process from apportionment to outlay in WCF operations.
- Understand allotment, obligation, and expenditure procedures.
- Learn strategies for modifying budgets in response to changing conditions.
- Explore reporting requirements and mid-year review processes.

Module 8: Project Orders and Economy Act Orders

- Differentiate between Project Orders and Economy Act Orders in WCF operations.
- Understand legal requirements and funding rules for each order type.
- Review processes for accepting and recording customer orders.
- Examine rules for serving non-federal customers and managing reimbursable agreements.

Module 9: Cash Management and Cost Control

- Define cash management and its importance in WCF operations.
- Identify causes and prevention of negative cash balances and Antideficiency Act violations.
- Implement strategies for revenue generation and timely collections.
- Review fiduciary responsibilities for all WCF stakeholders.

Module 10: Capital Investment

- Understand the purpose and funding of Capital Investment Programs (CIP) in WCFs.
- Learn capitalization and depreciation rules under federal accounting standards.
- Apply criteria for capitalizing improvements and upgrades.
- Review agency requirements for justifying and budgeting capital assets.

Module 11: Managing Inventory

- Recognize the types and costs associated with WCF inventory.
- Learn best practices for inventory control, including JIT and supply chain management.
- Understand the relationship between inventory management and NOR.
- Identify and address inventory variances and inefficiencies.

Module 12: Revenue Recognition in a WCF

- Apply appropriate revenue recognition methods for various WCF activities.
- Understand the percentage of completion method for manufacturing operations.
- Differentiate between revenue recognition and billing cycles.
- Recognize the impact of revised cost estimates on recognized revenue.

Module 13: Financial Analysis

- Use key financial ratios such as current, quick, and inventory turnover in WCF analysis.
- Understand the significance of the Net Operating Result in WCF performance.
- Evaluate financial health using ratio trends and industry benchmarks.
- Identify performance indicators affecting solvency and efficiency.

Module 14: Cost Accounting

- Learn the role of cost accounting in tracking and allocating WCF costs.
- Distinguish between job cost and process cost systems.
- Identify direct, indirect, fixed, variable, and semi-variable costs.
- Understand how cost allocation impacts pricing and NOR.

Module 15: Reporting Results

- Understand the GPRA framework and performance reporting requirements.
- Identify internal, OMB, congressional, and public reporting requirements.
- Recognize the link between performance data and funding decisions.
- Comply with quarterly and annual financial reporting obligations.

Module 16: Creating New Working Capital Funds—Internal and External

- Identify opportunities for adding new business lines or creating new WCFs.
- Differentiate between internal and external WCF creation processes.
- Understand OMB and congressional requirements for WCF authorization.
- Prepare the business case for a new WCF or expansion.

Module 17: Terminating Working Capital Funds and Their Products

- Recognize conditions under which a WCF or product line should be terminated.
- Identify financial, legislative, and competitive factors in termination decisions.
- Follow congressional procedures for WCF de-authorization and fund closure.
- Evaluate customer base viability and long-term sustainability.
